

# If You Could Do ONE Thing to Keep Them Safe...

The H1N1 virus affects children more than any other age group. The best way to protect them is with the H1N1 vaccine. Do the one thing that will best protect your child from the H1N1 flu.

**Protect your children from H1N1.  
Get them vaccinated.**

To find out where to get the vaccine, call your healthcare provider or 211, or go to [www.ct.gov/ctfluwatch](http://www.ct.gov/ctfluwatch)
